Resolved minor right-ear infection

Jordan Avery | DOB: 1991-04-16
Source: Maple Walk-In Clinic
Source date: 2025-11-04

FOLLOW-UP REASON

Review after a minor right-ear infection documented the preceding week. This is a standalone episode.

RECORDED OUTCOME

The patient reported that the ear discomfort had resolved. The follow-up note records no ongoing ear complaint and no further ear-related appointment in this dataset.

RECORD SCOPE

This note is limited to the resolved ear complaint described above.

SOURCE CONTEXT

The record intentionally represents a less relevant historical episode. It should remain searchable and available when a user explicitly chooses to include it in visit preparation.
