

Patient symptom diary

Jordan Avery (Synthetic) | DOB: 1991-04-16

Source: Patient-authored sample (Fictional)

Week ending: September 7, 2026

Entry date: September 0█, 2026

The final date digit is obscured in this synthetic scan.

PATIENT OBSERVATIONS

Morning: brief racing-heart sensation while sitting after breakfast.

Estimated duration: about 2 minutes. Nausea at the same time.

Afternoon: another brief racing-heart sensation while at a desk.

Exact start and stop times were not written down.

DETAILS TO CLARIFY

The entry does not record meal ingredients, caffeine quantity, or the time of any inhaler use. It does not establish a cause for the symptoms.

PATIENT QUESTION

Which timing details would help make the follow-up conversation clearer?

REVIEW NEEDED

Confirm the obscured entry date. Do not infer its last digit.

Record date uses the legible week-ending date, September 7, 2026.
